

## Next Steps

### **Pre-Application Consultation**

GreenPower is currently undertaking a period of pre-application consultation in order to better understand the local community's views on the project. This information will feed into the final project design, along with the other baseline environmental and technical information, resulting in a planning application which will be submitted to South Ayrshire Council.

During this consultation any comments made to GreenPower as the prospective applicant are not representations to South Ayrshire Council. Following the submission of any planning application, there will be an opportunity to make direct representations to the Council's Planning Service.

### **Keep in touch**

GreenPower would be pleased to keep you updated on the progress of the application. To register your contact details with us please write or email us using the details below.

We look forward to working with all stakeholders to bring a successful and environmentally acceptable project to fruition.

For more information about the project please contact:
