

VP4 View East from Lendalfoot

Millenderdale Wind Farm
Viewpoint Information
Grid Reference 213146E 590040N
Ground Height 244m AOD
Angle of View 90°
Viewing Distance 450mm
Layout Information
Hub Height 75m
Height to Blade Tip 125m
Nearest Visible Turbine 4728m
Number of Sets of Tips visible ¹ 4
Number of Hubs visible ¹ 2
Turbine visibility ² 078° to 089°

NOTES:

1. Applies to the wireframe only and ignores screening effects of woodland and other intervening objects.
2. All directions given as bearings relative to Grid North (BNG).
3. This visualisation has been produced using current best practice methodology. It aims to provide a realistic impression of the proposed development subject to the limitations of those photographic, IT and printing technologies used in its production.
